

KENTUCKY POLLUTANT DISCHARGE ELIMINATION SYSTEM

Combined Sewer Overflow (CSO) Annual Report For Publicly Owned Treatment Works

Submission of a Combined Sewer Overflow (CSO) Annual Report is a required condition of your Kentucky Pollutant Discharge Elimination System (KPDES) permit(s). The 2022 Annual Report is for the entire 2022 calendar year (January 1 – December 31).

A typed and complete CSO Annual Report must be received by March 1, 2023. All entries must be filled out completely, or the report will be considered deficient. It may be submitted as a single .pdf file through the DEP/DOW ePortal at <https://dep.gateway.ky.gov/ePortal/DesktopDefault.aspx> as submittal type of “DOW CSO Annual Report”. If you have any questions regarding submitting the report through the ePortal, send an email to the ePortal helpdesk at DEPTempoSA@ky.gov. A paper report may also be submitted to:

Division of Water
Surface Water Permits
300 Sower Blvd.
Frankfort, KY 40601

Failure to submit the report by the deadline may result in enforcement action, and the control authority may be considered to be in significant noncompliance.

Should you have any questions, contact Mark Absher at 502-782-4469 or mark.absher@ky.gov.

I. PERMITTEE INFORMATION

A. Name of Permittee:

Sanitation District No.1 of Northern Kentucky (SD1)

B. Wastewater Treatment Plant Name:

Dry Creek Wastewater Treatment Plant

KPDES Number:

KY0021466

County:

Kenton

II. CSO PROGRAM CONTACT INFORMATION

A. Name: Jason Burlage

B. Title: Regulatory Compliance Manager

C. Phone: 859-578-6892

D. E-mail Address: jburlage@sd1.org

E. Mailing Address:

1. Street: 1045 Eaton Dr.

2. City: Fort Wright

3. State: KY

4. Zip Code: 41017

III. CSOs ACTIVE DURING THE REPORTING PERIOD

A. List all CSO¹ outfalls that were active² at any time during the reporting period. Say whether each outfall was active² or eliminated³ at the beginning and at the end of the reporting period.

<i>CSO No.</i> ⁴	<i>CSO Name</i> ⁵	<i>Status on January 1</i>	<i>Status on December 31</i>	<i>Changes to CSO?</i> (Y/N)
010	Carmel Manor Rd CSO 0030031	Active	Active	N

B. For each CSO listed above that has a different status at the beginning and the end of the reporting period, describe the changes to the CSO status below. Reference or attach supporting documentation such as permit applications, permits, or approval letters. If a *CSO Outfall Elimination Certification* form was submitted to DOW prior to the end of the reporting period, list the date it was submitted and the approval date, if approved by DOW.

C. For each CSO listed above that has changes to CSO, describe the changes to the CSO components or operation. Examples of changes are modifications or removal of regulators, storage facilities, screening facilities, disinfection facilities, devices to prevent intrusion of receiving water such as flapgates or Tideflex valves, or monitoring equipment such as SCADA, real time control, and flowmeters.

River Water Intrusion (RWI) Program Phase I & II

- Outfall flap gates or check valve locations will reduce CSOs on the Ohio and Licking River. CSOs addressed by RWI protection include: 0880081, 0880082, 0910065, 0910068, 0930105, 0960063, 1420142, 1440206, 1440209, 1470093, 1480187, 1490132, 1710116, 1710119, 1710121, 1710124, 1720109, 1730259.

Diversion Manhole Weir Elevation Increase

- Weir elevation increase in diversion manholes 0960003, 0980036, 1440156, 1490027, 1870025 will reduce CSO volume and maximize flow to Dry Creek Wastewater Treatment Plant.

Notes:

1. "CSO" means a Combined Sewer Overflow that is a permitted outfall listed on the active KPDES permit and in EPA's ICIS program as a Permitted Feature.
2. "Active" means that the CSO regulator and outfall were capable of discharging sanitary or combined sewage (whether or not any discharge occurred) and were not plugged or removed at any time during the reporting period. This does not include any CSO outfall that has been converted to discharge only separate storm water prior to the beginning of the reporting period. All CSOs are considered "active" until a CSO Outfall Elimination Certification form has been submitted to DOW and approved.
3. "Eliminated" means that the CSO regulator and outfall were physically incapable of discharging sanitary or combined sewage. This includes a CSO outfall that has been converted to discharge only municipal separate storm water prior to the beginning of the reporting period. All CSOs are considered "active" until a CSO Outfall Elimination Certification form has been submitted to DOW and approved.
4. "CSO No." means the KPDES CSO No. listed on the active KPDES permit for each Combined Sewer Overflow outfall and in EPA's ICIS program as a Permitted Feature.
5. "CSO Name" means CSO Name listed on the active KPDES permit for each Combined Sewer Overflow outfall and in EPA's ICIS program in the Permitted Feature Description or Limit Set Name.

Comments:

IV. NINE MINIMUM CONTROLS

A. For each Nine Minimum Control, list the activities that were implemented during the reporting period. Describe the benefits achieved by implementing each activity for specific CSOs and/or system-wide.

<i>Nine Minimum Control</i>	<i>Activities Implemented During the Reporting Period</i>	<i>Descriptions of Benefits Achieved</i>
Proper Operation and Maintenance Programs	Utilized SD1's Continuous Sewer Assessment Program (CSAP) and System Condition & Risk Enhanced Assessment Model (SCREAM) to schedule inspections and rehabilitation activities.	-2 catch basins inspected -8 catch basins replaced -0 new catch basins installed -274 manholes repaired -6 manholes replaced -8 new manholes installed -710,430 feet of sewers inspected - 1,422 feet of sewers repaired
Maximize Use of Collection System for Storage	-91 cubic yards of grit removed from grit pits along interceptor sewers. -1,422 feet of sewers cleaned	Removed debris and solids from collection system, reduced risk of blockage, and enhanced in-line storage capacity during wet weather.
Pretreatment Program to Minimize CSO Impacts	-4 random wet weather inspections performed at 4 Significant Industrial Users in the CSS. - SD1 continues to inspect waste hauling manifests.	SD1 found no industrial impacts on the CSS in 2022.
Maximize Flow to WWTP for Treatment	Continued upgrades to the Bromley PS, multiple detention basins, and real time controls in the CSS. Weir elevation increases in 5 diversion manholes will reduce CSO volume and maximize flow to Dry Creek Wastewater Treatment Plant.	Completed upgrades will allow for increased conveyance and extended detention during wet weather.
No Dry Weather Overflows	-690 dry weather CSO inspections performed at 37 CSO regulators known to be susceptible to DWO. -Unknown number of blockages at CSO regulators were cleared during the 48-hour post-wet-weather inspection period.*	Five dry weather CSO were observed in 2022.
Control of Solids and Floatables in CSO Discharges	-10 catch basins cleaned -8 netbags replaced on CSO outfalls	10.5 cubic yards of solids removed from catch basins.

<i>Nine Minimum Control</i>	<i>Activities Implemented During the Reporting Period</i>	<i>Descriptions of Benefits Achieved</i>
Pollution Prevention to Minimize CSO Impacts	-Pollution prevention site audits at 4 SD1 facilities. --- Pollution prevention training for co-permittees was conducted with 21 communities represented. -Hosted Household Hazardous Waste Event.	-Continuous training for public officials and staff on pollution prevention best practices. -Over 287,200 pounds of hazardous waste collected from 2,661 residents and disposed of properly.
Public Notification of CSO Occurrences and Impacts	31 Wet Weather Overflow Notifications were sent in 2022.	1,798 total emails sent alerting the public of potential overflows due to wet weather.
Monitoring for CSO Impacts and Performance of CSO Controls	-2,544 wet weather CSO inspections -33 active flow meters within the CSS	Confirmed CSO activity for model verifications and proper SORP responses.
B. For any activities in the approved NMC Compliance Report that were not implemented during the reporting period, please explain why the activities were not implemented.		
C. Provide additional details of any activities listed in the table that were not in the approved NMC Compliance Report.		

Notes:

1. "CSO" means a Combined Sewer Overflow that is a permitted outfall listed on the active KPDES permit and in EPA's ICIS program as a Permitted Feature.

Comments:

***Data not captured during 2022. SD1 will resume documentation of this parameter in 2023.**

V. LONG-TERM CONTROL PLAN (LTCP)

A. For each CSO control project included in the approved Long Term Control Plan (and any subsequent modifications to the LTCP), list the project name and ID number and completion date as listed in the approved LTCP, actions on the project during the reporting period, actions planned to be taken on the project during the next reporting period, and status of the project at the end of the reporting period (for example, Future, Design, Construction, Completed with completion date).

<i>LTCP Project ID and Name</i>	<i>Approved Completion Date</i>	<i>Actions Taken During Reporting Period</i>	<i>Actions Planned During Next Reporting Period</i>	<i>Status at End of Reporting Period</i>
Aqua on the Levee Sewer Separation	12/31/20	None	None	Completed 01/15/19
Church Street Sewer Separation	12/31/20	None	None	Completed 10/25/18
Jacob Price Ph. 2 Separation	12/31/20	None	None	Completed 06/01/19
River Water Intrusion Program Phase 1	12/31/20	None	None	Completed 12/31/20
Amsterdam Valley Detention Basin (3.5 MG capacity)	N/A	None	None	Completed 10/1/20
Ash St CSO Elimination with EQ Tank	2023 in UWSP	Construction	None	Complete 12/22/22
Rivercenter Covington Separation	2023 in UWSP	None	None	Completed 05/16/19
River Water Intrusion Program Phase 2	2023 in UWSP	Complete	None	Completed
Saratoga and Washington Sewer Separation	2023 in UWSP	None	None	Complete 6/30/21
State Route 9 Separation	2029 in UWSP	PH 3 Design and Permitting	PH 3 Design and Permitting	PH 1 & 2 Completed 04/21/16
Water's Edge Separation	2023 in UWSP	None	None	Completed 7/26/16
Bromley Pump Station Upgrades	2029 in UWSP	Design, Construction	Construction	Construction
River Water Intrusion Program Phase 3 (8 locations)	2029 in UWSP	Construction	Construction	Construction
Willow Run Detention Basins Coordinated Control Retrofits	2029 in UWSP	1 Pilot Basin Complete, Planning	Design,	1 Basin Complete, Dynamic Controls Under Design / Construction
Combined System Coordinated Control Scheme (Phases 1-4)	2034 in UWSP	Planning	Planning	Planning
Ohio River Solution Gray Components	2034 in UWSP	Planning	Planning	Planning
Surface Stormwater Detention Basins (7 to 9 basin retrofits)	2034 in UWSP	Planning	Planning	Planning
Licking River Solution Gray Components	2040 in UWSP	Planning	Planning	Planning
Expanded Combined System Coordinated Control (Phase 5)	2040 in UWSP	Planning	Planning	Planning

B. Describe any changes in the project name, description, scope, or completion date from the approved LTCP. Changes to the project from what is in the approved LTCP and modifications require written notification to KDEP, and may require written approval.

Bromley Pump Station Improvements

- The initial project in the UWSP listed the target pumping capacity as 45 MGD achieved by making upgrades to allow for two large pumps to run concurrently, which would reduce TY CSO by 60 MG. After further analysis in the planning of the upgrades, it has been determined SD1 can instead upgrade the existing Bromley PS to increase capacity from 40 MGD to 45 MGD and build a diversion structure and second parallel pump station with an additional 30 MGD capacity. Each pump station will utilize the same force main. Therefore, when pumping together, there will be a combined 50 MGD pumping capacity. This major improvement will reduce TY CSO by 114 MG, provide greater operational resiliency in the event of failure, and will potentially allow for some smaller projects identified in the UWSP to be eliminated.

C. Attach a copy of the project table and Gantt chart, if available, from the approved LTCP.

Notes:

1. "CSO" means a Combined Sewer Overflow that is a permitted outfall listed on the active KPDES permit and in EPA's ICIS program as a Permitted Feature.

Comments:

VI. CSO DISCHARGES

A. Annual Totals of CSO Discharges

List the totals for the reporting period for each CSO listed in section III.A of this report. These parameters are listed on your KPDES permit to be monitored for each permitted CSO and are reported monthly in netDMR. In the last column, list all methods used for monitoring each parameter. If the monitoring was not continuous, provide the frequency that monitoring was done for each discharge event.

<i>CSO No.³</i>	<i>Occurrences (Number in 2022)</i>	<i>Duration (Hours in 2022)</i>	<i>Volume (Million Gallons in 2022)</i>	<i>Monitoring Method and Frequency</i>
010	1	0.2	0.001	Monthly modeled results. Post-wet weather inspections after 0.5" of rain.
011	40	168.4	0.724	Monthly modeled results. Post-wet weather inspections after 0.5" of rain.
012	1	1	0.007	Monthly modeled results. Post-wet weather inspections after 0.5" of rain.
013	18	9.2	0.075	Monthly modeled results. Post-wet weather inspections after 0.5" of rain.
014	18	9.8	0.167	Monthly modeled results. Post-wet weather inspections after 0.5" of rain.

Notes:

1. This form must be completed even if information has been submitted to meet other KPDES permit requirements.
2. "CSO No." means the KPDES CSO No. listed on the active KPDES permit for each Combined Sewer Overflow outfall and in EPA's ICIS program as a Permitted Feature.
3. Include only CSO discharges that occurred as a result of precipitation. Do not include dry weather overflows.
4. These totals should equal the sum of results reported on the 12 DMRs for the reporting period. If they do not match, explain in the Comments box.

Comments:

The units in the column headers for Section V were changed from "per year" to "in 2022." The summary totals provided above are model predictions for simulated rain events that were recorded by SD1's rain gauge network in 2022. These totals are not annual averages, typical year simulations, or post-wet weather inspection results.

VI. CSO DISCHARGES

B. Individual CSO Discharge Events

List each discharge event that occurred during the reporting period for each CSO listed in section III.A of this report. Include all discharges that occurred as a result of precipitation events.

<i>CSO No.³</i>	<i>Start and Stop Date/Time</i>	<i>Duration (hours per year)</i>	<i>Volume Discharged (million gallons)</i>	<i>Cause</i>

Notes:

1. This form must be completed even if information has been submitted to meet other KPDES permit requirements.
2. "CSO No." means the KPDES CSO No. listed on the active KPDES permit for each Combined Sewer Overflow outfall and in EPA's ICIS program as a Permitted Feature.
3. Discharge events should be listed in chronological order. For discharges from multiple CSOs that occurred at the same time, list the CSOs in order by CSO No. for each date/time.

Comments:

VII. PRECIPITATION

A. Annual Total Precipitation

List the totals for precipitation for the reporting period.

Total number of precipitation events: **111** Total depth of precipitation (inches): **53.08**

B. Precipitation Events

List each precipitation event that may have impacted the combined sewer system during the reporting period.

Provide the location of each rain gauge or describe the source of the precipitation information.

Notes:

1. This form must be completed even if information has been submitted to meet other KPDES permit requirements.
2. Precipitation events should be listed in chronological order.

Comments:

All precipitation totals listed above were collected by one of nine permanent and routinely maintained SD1 rain gauges located in the combined sewer system. The rain events recorded by these nine rain gauges were used to run simulations in SD1's hydraulic models to predict CSO occurrences, durations, and volumes provided in Section VI. B. The individual rain events provided above represent the max depth recorded for that date at one of the nine rain gauges.

VIII. CERTIFICATION STATEMENT¹

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is to the best of my knowledge and belief true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
